

Bonitas Depression Disease Authorisation Basket
October 2025

Nappi codes specified on this list are payable for members with Chronic Medicine Management disease authorisation for depression. Nappi codes not specified on this list require a nappi specific authorisation and potentially a clinical motivation and/or a specialist prescription. Reimbursement of chronic medication is subject to the Chronic Medicine Management clinical guidelines and protocols, as well as the Bonitas Reference Price List (MPL). MPL is a reference pricing system which may apply to some medication. Medication which has generic equivalents available may have MPL applied. If there is a less costly generic alternative available to the medication being claimed, a co-payment may apply. The co-payment will be the cost difference between the product that is claimed and the cost of the less costly alternative. Reference prices accurate on 13 May 2025.
